

Brainstorming & Idea Prioritization Template

Date	04 July 2026
Team ID	
Project Name	Rising Waters – Flood Prediction System
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Lahari Sri Kotipalli	Predict flood risk from rainfall & weather readings using ML	Disaster Management	1
2	Lahari Sri Kotipalli	Show a real-time animated risk gauge instead of a plain yes/no result	UI/UX	2
3	Lahari Sri Kotipalli	Compare multiple ML classifiers (Decision Tree, Random Forest, KNN, Gradient Boosting) and deploy the best one	Machine Learning	1
4	Lahari Sri Kotipalli	Add a light/dark theme toggle for accessibility and better readability at night	UI/UX	2
5	Lahari Sri Kotipalli	Deploy the trained model behind a	Deployment	1

		simple Flask form so non-technical users can use it		
6	Lahari Sri Kotipalli	Integrate live weather API data instead of manual entry (future scope)	Future Enhancement	3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility	Importance	Priority	Selected
1	ML-based flood prediction served via a Flask web form with a trained classifier + scaler	High	High	1	Yes
2	Animated risk gauge and light/dark theme for a clearer, more usable result page	High	Medium	2	Yes
3	Live weather API integration for automatic input instead of manual entry	Low	Medium	3	No
