

Demonstration of Proposed Features

Date	04 July 2026
Team ID	
Project Name	Rising Waters – Flood Prediction System
Maximum Marks	1 Mark

Demonstration of Proposed Features:

Tracks whether each feature proposed during planning was implemented and demonstrated, updated to include the authentication and history features added since the original submission.

S. N O	Feature Name	Description	Status	Demonstrated	Remarks
1	User Registration & Login	Email/password accounts plus “Continue with Google”	Implemented	Yes	Verified new-account signup, logout/login, and Google linking
2	Prediction Form	10-field weather/rainfall input form	Implemented	Yes	Matches the model's expected feature set; only reachable once logged in
3	Prediction Logic	Scales input and runs the trained classifier	Implemented	Yes	Verified with both high- and low-risk sample values
4	Result Page + Risk Gauge	Animated gauge showing prediction risk level	Implemented	Yes	Confirmed on both chance.html and no_chance.html
5	Prediction History	Saves and lists each user's past predictions, with delete	Implemented	Yes	Verified a new prediction appears immediately and deletes correctly
6	Light/Dark Theme Toggle	Switches and persists theme preference	Implemented	Yes	Verified persistence across page reloads
7	Deployment Config	Procfile + Unicorn for Render hosting	Implemented	Yes	Ready for push to Render, now with environment-variable secrets
8	Live Weather API Auto-fill	Automatic input from a weather API instead of manual entry	Pending	No	Planned as a future enhancement

Feature Implementation Summary:

Metric	Value
Total Features Proposed	8
Total Features Implemented	7
Total Features Demonstrated	7

Metric	Value
Overall Implementation Rate (%)	88%
